

The Corporate Source

Work, redefined.

IT Training and A+ Certification Program

Celebrating our 27th year impacting lives, The Corporate Source (TCS) works with corporate and governmental partners to create employment opportunities for individuals with disabilities and provides services leading to independence and fulfillment.

In recent years, the IT field has grown exponentially and there is a high demand for qualified IT professionals as remote work has changed the landscape of our workplace. However, there still remains an absence of IT training programs for people with differing abilities to access these opportunities. TCS hopes to meet this need with our innovative IT Training & A+ Certification program.

Google IT Support Professional

Core 1 and Core 2

April 2024 | 18 weeks
Apply Today!

With the Google IT Support Professional Certification, you will establish a solid foundation for your career in IT. You'll master essential skills in troubleshooting, networking, system administration and security. The CompTIA A+ Certification is a powerful and respected credential that employers trust. Unlike other certifications, many of which only require covering one domain, CompTIA A+ covers a broader diversity of knowledge required of technicians today, making it relevant to many more job roles.

With these certifications, you'll stand out to employers and open doors to exciting opportunities in the tech industry!

make **iT** happen.

- TCS provides all training materials, computer hardware and software for students in the program during instruction.
- 18 weeks of live virtual training will offer interactive opportunities for students to ask questions during classroom sessions, with small class sizes granting plenty of hands-on instruction; space is limited.
- All students receive workplace soft skills training in addition to technical instruction and earn exam vouchers to obtain CompTIA A+ Core1 and Core 2 certifications; 3 - 5 hour daily commitment is required.

TCS is thrilled to partner with Codecraft Works, an innovative company dedicated to making high-tech skills and careers more accessible to everyone.

Contact us today to learn more about this transformative opportunity for individuals with disabilities to kickstart their IT careers.
